

BASIC PRODUCT INFORMATION

Type of fuel	Bioethanol
Maximum capacity of bioreactor (l)	1
Fuel consumption (l/h)	0,25
Construction material	P265GH acc. to EN 10028-2
Surface finish	High-temperature fireplace paint
Weight (kg)	16,3
Dimensions width x height x depth (mm)	800x400x185

The BLUES biofireplace is an elegant corner appliance that is capable of creating an amazing atmosphere in any room. Thanks to the side glazing, the vision of the fire in the bio-fireplace is even more extensive compared to standard models. The elegant appearance and slim design makes the bio-fireplace ideal for hanging directly on the wall. The panoramic design of the bio-fireplace and the wave-shaped burner provide an amazing vision of the fire. BLUES has been equipped with an original slim biocontainer with increased capacity, extending the burning time up to 4 hours. The design of the biofuel container has increased its functionality by introducing a removable cover, which makes the process of filling with biofuel much easier. The cover of the bio-fireplace has been marked with clear pictograms, affecting the safety of use. Together with the bio-fireplace, the user receives a dedicated extinguisher with a handle. The bio-fireplace itself is equipped with an absorbent insert to protect the bio-fireplace from fuel spillages in case the appliance is accidentally tilted.
