

BASIC PRODUCT INFORMATION

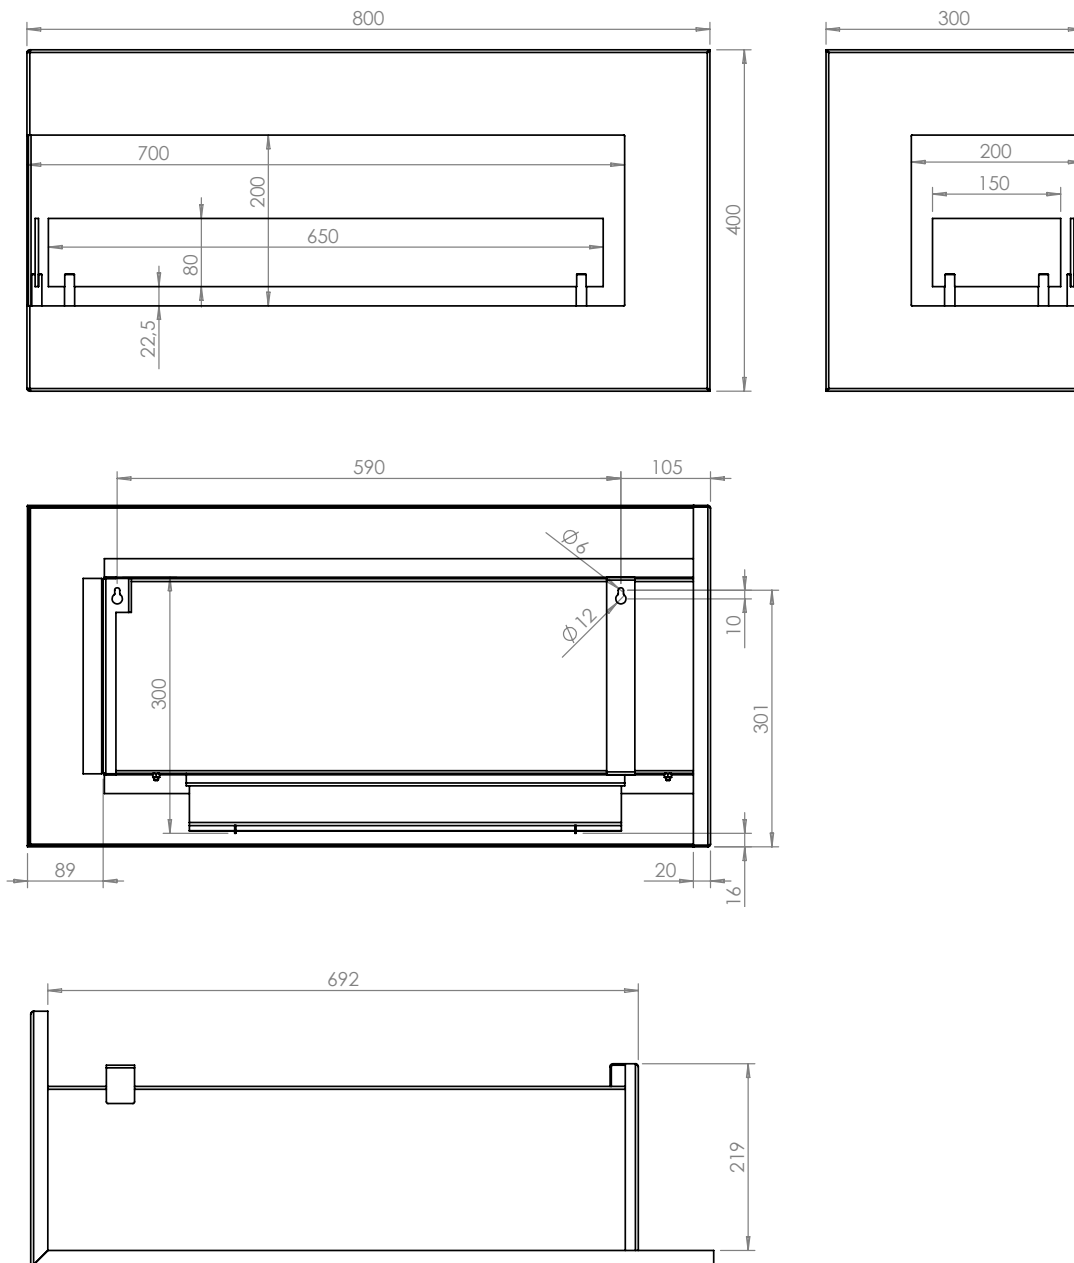

Type of fuel	Bioethanol
Maximum capacity of bioreactor (l)	1
Fuel consumption (l/h)	0,25
Construction material	P265GH acc. to EN 10028-2
Surface finish	High-temperature fireplace paint
Weight (kg)	14,3
Dimensions width x height x depth (mm)	800x400x300

Biofireplace SOUL is an elegant corner appliance, which is able to bring an amazing mood into any room. Thanks to the use of side glazing, the vision of fire in a bio-fireplace is even more extensive in comparison with standard models. Due to its construction, SOUL can be designed to be installed in a dedicated wall niche. This type of solution is very popular, as the appliance installed in this way is even more associated with a traditional wood-burning fireplace. The panoramic design of the bio-fireplace and the wave-shaped burner provide an amazing vision of the fire. Biofireplace SOUL, has a minimalist, rectangular shape that makes it easy to create a dedicated wall niche. Along the outer edges of the body there is an additional flange that is able to mask the imperfections of the wall in which the appliance is built.
